

COVER LETTER TOM KOTTERER VACANCY AGILE TESTER - ALBERT HEIJN

07-10-2021

Dear Mr/Ms,

I came across the position for QA Engineer, as advertised on LinkedIn. Through this cover letter I would like to introduce myself.

In 2015 I graduated from the Hogeschool van Amsterdam and have been working as a Software Tester for over 6 years now. Keeping track of the testscripts, assessing possible scenarios and put these into practice, but most of all working together with developers and making sure the quality of the products are always up to standard. This is what I strive for in my job.

I am used to work together with people from all disciplines and love to work in an environment where there's a good teamspirit and clear goal. I'm always open for new techniques and learning new ways to help me improve my work. I'm an honest person and contribute to a good team atmosphere.

Working for Albert Heijn sounds like a valuable opportunity. Lots of people including myself depend on Albert Heijn on a daily basis. IT is the backbone in making this happen and run smoothly - which is one of the reasons why this job offer stood out for me. I like the idea of not only depending on Albert Heijn on a daily basis, but Albert Heijn depending on me as well.

To sum it up: I would like to work at Albert Heijn and hope it can be a place where I can develop my skills in automated testing and many more. My expertise and background will be a valuable asset to the team and I would like to refer to my LinkedIn page to support that finding.

It would be my pleasure to get to know you and explain more about this letter and my resume.

Sincerely,

Tom Kotterer
